About HELI...

Anhui Forklift Truck Group is the largest manufacturer of material handling equipment in China, and is rated one of the ten largest in the world! Headquarters for the material handling equipment group is located in the Anhui Province in the city of Hefei with R&D, manufacturing and export operations all located in this location. In addition, Anhui Forklift Truck Group draws on the capabilities of three subsidiary companies, fifteen share-holding companies, and three joint-venture companies, allowing Heli to position itself as one of the most vertically integrated manufacturers in the global material handling business. Anhui Heli Group started in 1958 and is currently classified as one of the top national key enterprises in China. Anhui Heli maintains the only National Technology Center in the Chinese forklift industry. Anhui Heli Co., Ltd. is listed on the Shanghai Stock Exchange under Stock Code: 600761. Based on Anhui Heli's advanced R&D technology, state of the art ISO Certified manufacturing facilities, and hands on management team, Heli has the ability to supply dealers with the best material handling equipment and aftermarket support available in the world.

As a national high-tech enterprise, Heli has set up a quality system and has received both the ISO9001 and 14001 certifications, and Europe's CE safety certificates. The current Heli product lines available in the United States range in base capacities from 2,000 lbs. to 40,000 lbs.

Heli continues to expand their design and manufacturing capabilities by building on their 260-acre site in the Hefei Industrial Park. In 2007, they invested over \$190 million to increase the capacity at this new factory. Heli continues the drive to become an even more comprehensive factor in the global lift truck market, by specializing in world class R&D, manufacturing and aftermarket support for their complete line of material handling equipment.
